

# Peters<sup>®</sup> Professional

Power P 9-40-25+TE

## Product Information

Peters Professional offered by ICL is the brand to count on when needing 100% water soluble fertilizers. It has different varieties that respond to specific situations and different growth phases.

Thanks to its exclusive M-77 chelating formula, Peters Professional assures that nutrients and trace elements remain readily available for fast and easy uptake. M-77 "unlocks" the rooting area, allowing an effective increase in the absorbing of nutrients. What is offered to a plant is only important if the plant can actually absorb it.

Whether choosing Peters Professional by ICL as a standard fertilizer, or as a means to solve a particular problem, rest assured it will always deliver a complete fertilization plan.

### Guaranteed analysis

<b>9%</b>	<b>TOTAL NITROGEN (N)</b> 9.0% urea nitrogen (Ur-N)
<b>40%</b>	<b>PHOSPHORUS PENTOXIDE (P<sub>2</sub>O<sub>5</sub>)</b> Soluble in neutral ammonium citrate and in water, 40.0% water soluble 20.0% Poly-phosphates
<b>25%</b>	<b>POTASSIUM OXIDE (K<sub>2</sub>O)</b> 25.0% water soluble
0.02%	Boron (B)
0.016%	Copper (Cu) chelated by EDTA
0.12%	Iron (Fe) chelated by DTPA
0.06%	Manganese (Mn) chelated by EDTA
0.010%	Molybdenum (Mo)
0.016%	Zinc (Zn) chelated by EDTA

### Product characteristics

EC at 1 g/l (25°C)	: 0.7 mS/cm
Maximum solubility	: 21 kg / 100 litre water (25°C)
Acidity(A)/Basicity(B)	: A 0.184 kg CaCO <sub>3</sub> /kg Peters
Packaging details	: 15 kg, plastic bag
Product code	: 2123

### Directions for use

Peters Professional Power P is especially designed to increase the availability and uptake of phosphates by the plant. Due to its unique composition, the product performance and plant reaction is stronger than with other conventional phosphate products.

The high level of poly-phosphates in Peters Professional Power P offers growers the opportunity to react fast on changing circumstances. Different to other polyphosphate products, there is no need to add other fertilizers to the stock solution. The acidity of the stock solution will stabilize automatically. Peters Professional Power P should not be mixed in the same tank with fertilizers containing magnesium.

To ensure that this product dissolves completely, prepare the stock solution 1-2 hours before use, stir well or use warm water. Please contact your ICL advisor for a specific crop recommendation. This product should not be mixed with Peters Excel.

## Features and benefits of Peters Professional

- Small granules which easily dissolve; 100% water soluble.
- Pure formulation, no ballast substances.
- Contains NPK, magnesium and trace elements.
- Fast plant response after application.
- Developed for peat based cultures (pot plants, bedding plants and container nursery stock).
- Only Peters fertilizers contains the unique M-77 chelating formula!

**Recommended application rates**

Continuous feeding 0.5 – 1.5 g/litre  
 Occasional feeding (e.g. 1 x week) 0.8 - 2 g/litre

**Attention**

Trial first on a small scale before rate, application or other changes in your cultural practices are implemented. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be made responsible for any negative results.
