

Agriform®

Planting Tablets

20-10-5

SKU - G90026
21 Gram Tablet

SKU - G90805
10 Gram Tablet

SKU - G900915
5 Gram Tablet

Agriform® 20-5-10 tablets contain ureaformaldehyde as the slow release Nitrogen (N) source, combined with available Phosphorus, Potassium, secondary and micronutrient elements that are compressed into a convenient, easy-to-apply 5 gram, 10 gram or 21 gram tablets. Once placed in the root zone, the tablet slowly dissolves and Nitrogen is gradually released by soil microbial activity to roots surrounding the tablet.

Target Crops/ Special Uses

Agriform® tablets provide a safe, scientifically complete plant nutrition program which feeds trees, shrubs and groundcovers for up to two years. These compact, easy-to-use fertilizer tablets eliminate the need for repeated fertilizer applications for newly planted and established plants. The target crops for this product include:

- New landscape plantings in ground: Bare root, B&B, container stock and ground covers
- Forestry and nursery outplantings
- Interior and outdoor landscaping in containers and tubs
- In nursery containers of various sizes, planted with perennials and nursery stock
- Established trees and shrubs in landscape

PRODUCT ADVANTAGES:

- Successfully used right out of the box - no need for dilution, mixing or measuring
- Safe, easy to handle and convenient to apply
- Contains N-P-K, (Ca, Mg & S) and micronutrients
- Supplies slow release N to roots for up to two years
- Pre-measurement insures quick application, uniform rates, reduces application errors, spillage and waste
- Eliminates wasteful fertilization of weeds and grass on surface
- Leach resistant properties of nutrients protect groundwater from pollution

Derived from: Urea, Methylene Ureas, Calcium Phosphate, Potassium Sulfate, Calcium Sulfate, Magnesium Oxide, Sodium Borate, Copper Sulfate, Iron Sulfate, Manganese Sulfate and Zinc Sulfate.

* Contains 3.2% slowly available Methylenediurea and Dimethylenetriurea Nitrogen.

APPLICATION RATES

The application rates listed are intended as a guideline in developing a fertilization program. These rates may or may not apply to your area or growing conditions. It is the responsibility of the grower to determine the appropriate rate. Your rate may be higher or lower than suggested based on your growing conditions. Follow label instructions and use care when handling all fertilizer products.

NEW LANDSCAPE PLANTING DIRECTIONS:

- Dig planting hole deeper and wider than the soil ball of the plant.
- Backfill hole so that proper planting depth is achieved.
- Place plant in the hole and backfill to halfway point.
- Do not place tablets in the bottom of the planting hole.
- Place Agriform® Tablets in the hole about 1-2 inches away from root tips.
- Finish filling the hole around the plant to grade level.

INDOOR/OUTDOOR CONTAINERS:

- Make one hole per tablet 2-3 inches in from edge of container 4-6 inches deep.
- Insert tablets and close holes.

ESTABLISHED LANDSCAPE TREES AND SHRUBS:

- Drill or punch holes 6-8 inches deep around dripline and between dripline and trunk.
- Insert tablets and close holes.
