

20-19-20 Balanced Feed

SKU – G93200
Packaging – 50 lb

Agrolution® pHLow™ water soluble fertilizers have been developed with a dual purpose in mind; efficiently deliver all available nutrients in the correct proportions, and provide the convenience of solving water quality problems with just one product

Features

- Effective high alkalinity and pH management
- Improved nutrient delivery
- All-in-one convenience
- Keeps irrigation systems clean

Specific Usage

Agrolution pHLow 20-19-20 balanced feed is designed for application at the crop root zone via fertigation. This nutrient source provides a balance of the primary nutrients (nitrogen, phosphorous, potassium) along with a base level of all micronutrients. Agrolution pHLow 20-19-20 balanced feed can be used for general crop nutrition at all times of the crop cycle.

Product advantages

- Agrolution pHLow 20-19-20 provides balanced crop nutrition in an easy-to-use package, perfect for use at any stage.

Water Soluble Fertigation Fertilizer

An all-in-one water soluble nutritional package for high-value crop growers who battle high pH and high alkalinity in their irrigation water and/or their soils.

Patented pHlow technology

- Reduces stock solution pH allowing growers to neutralize highly alkaline irrigation water keeping vital nutrients from precipitating.
- Neutralizes bicarbonates in alkaline irrigation water limiting "scale" buildup in tanks, piping and emitters.
- Creates a low pH in soil solution improving nutrient availability to the plant.
- Provides a safer alternative than handling mineral acids.

Other features include:

- High percentages of chelated micronutrients
- High maximum solubilities
- No chlorides
