

32-11-11 High N

All-purpose fertigation formulation for increased plant vigor and vegetative growth plus improved leaf expansion.

SKU – G93261

Packaging – 50 lb

The Agrolution® portfolio offers a wide range of analyses covering all stages of crop growth and offering solutions for specific soil and water types. This advanced line of root zone fertigation fertilizers has been developed to supply readily available nutrients in the correct proportions while offering the convenience of a single-bag solution to fit any agronomic need.

Features

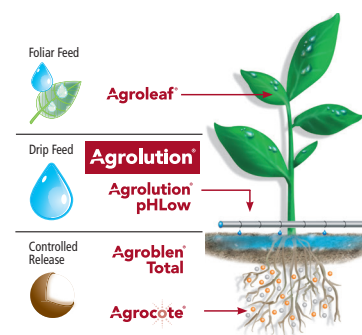

Each Agrolution formulation offers a quick dissolving, fully soluble fertilizer plus a balanced mix of fully chelated micronutrients with enhanced zinc and iron concentrations. Agrolution brings you one step closer to optimal crop quality, setting a new standard in fertigation for all substrate grown and soil grown fruit and vegetable crops

Specific Usage

Agrolution 32-11-11 High N is designed for use during the vegetative stage when nitrogen is needed to push growth. This all-purpose formulation can be used on a variety of crops and contains the fully chelated micronutrient pack, M-77.

Product advantages

- All-in-one convenience
- Improved crop growth, quality and yield
- Non-acidic formulation for low pH soils, low alkaline water
- Pure ingredients
- Dissolves completely
- Keeps irrigation systems clean
