

16-3-26 +3.4 Ca HIGH K with Ca

High potassium fertigation formulation to promote fruit set and fruit quality plus increased stalk strength.

The Agrolution® portfolio offers a wide range of analyses covering all stages of crop growth and offering solutions for specific soil and water types. This advanced line of root zone fertigation fertilizers has been developed to supply readily available nutrients in the correct proportions while offering the convenience of a single-bag solution to fit any agronomic need.

Features

Each Agrolution formulation offers a quick dissolving, fully soluble fertilizer plus a balanced mix of fully chelated micronutrients with enhanced zinc and iron concentrations. Agrolution brings you one step closer to optimal crop quality, setting a new standard in fertigation for all substrate grown and soil grown fruit and vegetable crops.

Specific Usage

Agrolution 16-3-26 is designed for use during the reproductive (fruit establishment) stage, and provides an elevated ratio of potassium to nitrogen. It can be used to improve crop quality or to supplement in soils deficient in potassium. The additional calcium further improves crop quality. This High K formulation can be used on a variety of crops and contains the fully chelated micronutrient pack, M-77.

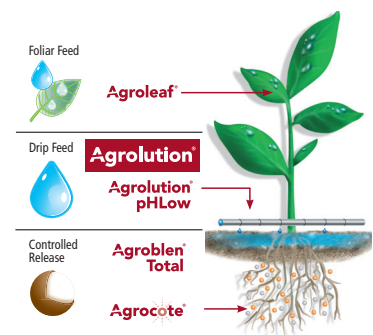

SKU – G93265

Packaging – 50 lb

Product advantages

- All-in-one convenience
- Improved crop growth, quality and yield
- Non-acidic formulation for low pH soils, low alkaline water
- Increased level of calcium
- Pure ingredients
- Dissolves completely
- Keeps irrigation systems clean

GUARANTEED ANALYSIS 16-3-26

Total Nitrogen (N)	16%
3.2% ammoniacal nitrogen	
12.8% nitrate nitrogen	
Available Phosphate (P ₂ O ₅)	3%
Soluble Potash (K ₂ O)	26%
Calcium (Ca)	3.4%
Boron (B)	0.02%
Copper (Cu)	0.05%
0.05% chelated copper (Cu)	
Iron (Fe)	0.15%
0.15% chelated iron (Fe)	
Manganese (Mn)	0.05%
0.05% chelated manganese (Mn)	
Molybdenum (Mo)	0.0005%
Zinc (Zn)	0.1%
0.1% chelated zinc (Zn)	

Derived from: Ammonium Nitrate, Monopotassium Phosphate, Potassium Nitrate, Calcium Nitrate, Boric Acid, Copper EDTA, Iron EDTA, Manganese EDTA, Ammonium Molybdate, Zinc EDTA

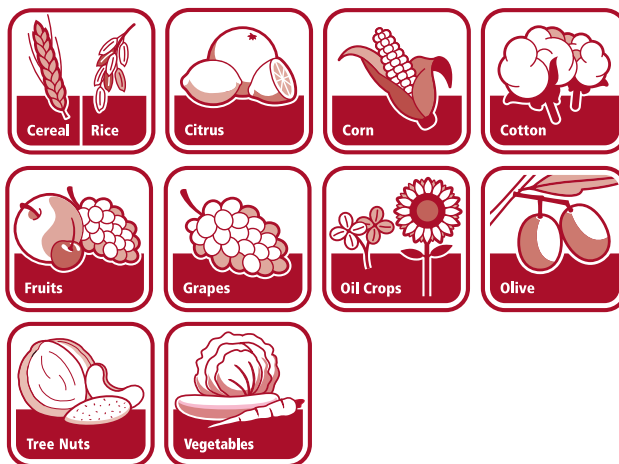

The Everris™ Testing Laboratory is a reliable source for testing water, growing media/soil or plant tissue. Everris recommends a soil test before initiating any nutrition program. For test kits, call 1-877-467-8522.

Directions for Use

This product is designed for application at the crop root zone via fertigation.

Product Range

Name	Formulation
Balanced Feed	20-20-20
High N	32-11-11
High K	11-6-20 +6Ca +1.5Mg
Low P	20-2-20 +1.5Mg
Zero P CalMag	15-0-15 +5Ca +2Mg
High K with Ca	16-3-26 +3.4Ca
