<sup>3</sup>The nitrogen, phosphate, potash, magnesium, sulfur, boron, iron, manganese, molybdenum, and a portion of the zinc sources have been coated to provide 15% coated slow-release nitrogen (N), 9% coated slow-release available phosphate (P<sub>2</sub>O<sub>5</sub>), 12% coated slow-release soluble potash (K<sub>2</sub>O), 1.3% coated slow-release magnesium (Mg), 5.9% coated slow-release sulfur (S), 0.02% coated slow-release boron (B), 0.45% coated slow-release iron (Fe), 0.06% coated slow-release manganese (Mn), and 0.02% coated slow-release molybdenum (Mo), and 0.016% coated slow-release zinc (Zn).

Directions

- recommended for use in covered greenhouses (low to medium rates suggested), nurseries, landscape beds, and containers
- verify product analysis, longevity, and rates (for assistance, contact your regional ICL Territory Manager or call ICL Customer Service at 800-492-8255)
- thoroughly blend into growing media to ensure uniform distribution without over-mixing
- growing media should be used two to four weeks after incorporation
- for top-dress applications, spread fertilizer evenly on container surface (avoid piling fertilizer directly against plant stem)
- irrigate after application (irrigation frequency and volume should be monitored and adjusted during the crop production cycle)
- a product trial is recommended before adopting a new fertilizer program or making full-scale changes to standard local practices
- use caution when applying to plants being over-wintered under cover (if you can't monitor soluble salts and/or adjust irrigation, avoid Fall and Winter applications)
- store in a clean, cool, dry place
